v.

Case No: 21-MJ-292 RCL

CHRISTOPHER WORRELL,

Defendant.

**MOTION FOR LEAVE TO FILE SUR-REPLY IN OPPOSITION TO  
DEFENDANT’S EMERGENCY MOTION TO REVOKE DETENTION ORDER**

The government respectfully requests leave to file a sur-reply in the above-captioned case, in response to certain factual points raised in the defendant’s reply to the Government’s opposition. In general, “a party seeking to file a sur-reply may do so only by seeking leave of court,” typically to address issues raised for the first time in a reply brief. *Flanagan v. Wyndham Int’l Inc.*, 231 F.R.D. 98, 101 (D.D.C. 2005); *see Amobi v. D.C. Dep’t of Corr.*, 257 F.R.D. 8, 9 (D.D.C. 2009). In exercising its discretion to permit or deny a sur-reply, the Court may consider “whether the movant’s reply in fact raises arguments or issues for the first time, whether the non-movant’s proposed surreply would be helpful to the resolution of the pending motion, and whether the movant would be unduly prejudiced were leave to be granted.” *Banner Health v. Sebelius*, 905 F. Supp. 2d 174, 187 (D.D.C. 2012) (citing *Glass v. LaHood*, 786 F. Supp. 2d 189, 231 (D.D.C. 2011)).

In Mr. Worrell’s reply, he asserts that he has still not received “Gazyva, Bendamustine, or any other cancer treatment,” and that it is “undisputed” that he is still “being denied treatment for his lymphoma.” Dkt. 89 at 2. The government requests leave to file its sur-reply to respond to this particular factual claim—the first portion of which is new—and to update the Court on the most recent medical records relating to Mr. Worrell, which the government believes will be

“helpful to the resolution of the pending motion.” *Banner Health*, 905 F. Supp. 2d at 187. Updating the Court with Mr. Worrell’s most recent medical records is also appropriate given that Mr. Worrell’s emergency motion may now be adjudicated in light of the order from the D.C. Circuit dismissing Mr. Worrell’s appeal of this Court’s prior detention reconsideration order and issuing the mandate. *See United States v. Christopher Worrell*, No. 21-3040 (D.C. Cir. Sept. 15, 2021) (Clerk’s Order).

The proposed sur-reply is attached to this motion. The sur-reply also has an attached “Exhibit 2.”

Respectfully submitted,

CHANNING D. PHILLIPS  
Acting United States Attorney  
D.C. Bar No. 415793

**Case No: 21-CR-292 RCL**

**CHRISTOPHER WORRELL,**

**Defendant.**

**ORDER**

In consideration of the Government’s Motion for Leave to File Sur-Reply in Opposition to Defendant’s Emergency Motion to Revoke Detention Order, it is by the Court this \_\_\_\_\_ day of September 2021,

ORDERED that, good cause having been shown, the motion is GRANTED. The government may file its proposed sur-reply on the docket.

\_\_\_\_\_  
HON. ROYCE C. LAMBERTH  
United States District Judge

v.

Case No: 21-MJ-292 RCL

CHRISTOPHER WORRELL,

Defendant.

**SUR-REPLY IN OPPOSITION TO  
DEFENDANT’S EMERGENCY MOTION TO REVOKE DETENTION ORDER**

The government files this sur-reply to respond to Mr. Worrell’s contention in his reply brief that he has still not received “Gazyva, Bendamustine, or any other cancer treatment,” and that it is “undisputed” that he is still “being denied treatment for his lymphoma.” Dkt. 89 at 2.

That latter statement is certainly disputed. The government is attaching the most recent 25 pages of Mr. Worrell’s medical records, which contain those records that have been entered since August 12, 2021. The records indicate that Mr. Worrell has now received the two biopsies that he complained of not having received in his original motion—the same biopsies he previously declined to attend. *See* Ex. 2 at 9, 14; Dkt. 85 at 8-9 (detailing Mr. Worrell’s previous refusals to attend these biopsies). On September 3, he was seen at Georgetown University Hospital’s interventional radiology unit for an “ultrasound guided [biopsy]” of his lymph nodes. *Id.* at 14. On September 7, he was seen by Howard University Hospital for a punch skin biopsy. *Id.* at 9. The pathology results from these biopsies are pending, but anticipated in the next week or so. *Id.*

Mr. Worrell’s reference to “Gazyva” and “Bendamustine” appears to refer to Dr. Ali’s statement that the appropriate treatment for his symptoms is “likely to be Gazyva/Bendamustine.” Ex. 2 at 27. But that was a prediction, not a recommended course of treatment. Dr. Ali’s

recommendation was that Mr. Worrell first receive a battery of diagnostic tests, all of which he has now received, before deciding on treatment. *Id.*; *id.* at 26 (Dr. Ali noting that he will “determine [treatment] plan once lymph node and skin biopsies are completed”). The delay in obtaining those diagnostic tests, as the government previously explained, is attributable to Mr. Worrell’s refusal to attend his skin biopsy and lymph node biopsy when those were scheduled in July. *See* Dkt. 85 at 8-9. Once the pathology results from those biopsies are back, Mr. Worrell’s Chronic Care team, in consultation with Dr. Ali, will determine the appropriate treatment for his cancer, which may include Gazyva or Bendamustine.<sup>1</sup>

Once again, therefore, the medical records refute the claim that Mr. Worrell is “being denied treatment for his lymphoma.” Dkt. 89 at 2. He is in fact routinely receiving care for his lymphoma, including at world-class outside hospitals with specialties in cancer care.

Incidentally, in the last month, Mr. Worrell has also now been seen three times by a physical therapist for pain in his left shoulder, *see* Ex. 2 at 2, 10, 16, received the new prescription eyeglasses he requested, *see id.* at 16, has continued to be seen approximately every two weeks by his Chronic Care team, *id.* at 1, 5-9, 17-19, 20-22, and has had a variety of blood tests conducted, some apparently at his request, *see id.* at 3-5. Mr. Worrell is receiving care for every ailment he brings to the attention of the D.C. Jail staff. His emergency motion to revoke the detention order should be denied as meritless.

Respectfully submitted,

CHANNING D. PHILLIPS  
Acting United States Attorney  
D.C. Bar No. 415793

---

<sup>1</sup> As the government has previously outlined, it appears that Mr. Worrell had no plans to obtain any of this type of treatment or testing prior to his arrest.

**Physical Therapy**

**Visit Type: Initial Visit**

**Interview**

Patient assessment of current condition/

response to previous treatment: Pt reports loosing consciousness and falling in early June 2021 and sustaining a fall which resulted in R hand fx and L shoulder pain. Pt describes L shoulder pain as sharp in the anterior aspect of the shoulder with pain radiating along the deltoid. Pt c/o pain with "chicken wing" motion 90 degrees abd with elbow flexion and shoulder IR and when laying on L shoulder. Pt also c/o pain with end range of overhead reach. Pt denies pain at rest when not applying pressure through the shoulder. Pt reports pain range 3-5/10. Pt reports self PT of stretching L shoulder to help maintain ROM since onset of pain and avoiding laying on L shoulder.

Intensity pain rating and characterization of pain: 5/10

Walking: not limited

Fall risk: no

**Exam**

Location: Left and Right; Shoulder

Shoulder

**Range of Motion:** shoulder flex: bil shoulder AROM WNL

shoulder abd: R: WNL L: 122 AROM, WNL PROM with c/o painful arc

shoulder ext: WN bil

shoulder IR: WNL bil

shoulder ER: WNL bil with c/o L shoulderp qin at end range

**Strength:** shoulder flex: R: 5/5 L: 4+/5

shoulder abd: R: 5/5 L: 4-/5

shoulder ext: R: 5/5 L: 4+/5

shoulder IR: 5/5 bil

shoulder ER: R: 5/5 L: 4-/5

**Current Allergies:**

\* PERCOET: HIVES (Critical)

**Other HPI**

-

**#. Primary cutaneous follicular b cell lymphoma**

-recurrent, with lesions on face, neck, and upper chest

**-following with HUH oncology with recommendation for: repeat skin bx, bone marrow bx and PET/CT for interim staging**

---**skin bx** is pending (derm eval was scheduled but PT REFUSED visit, this has been rescheduled and is pending)

---**bone marrow biopsy** was completed 6/2021 and is WNL

---**PET/CT** scans done 6/2021 and significant for new "mildly active" submandibular and cervical lymphnodes c/f possible lymphomatous/tumor involvement

---given PET findings, seen by ENT with rec for **US-guided FNA** with IR --this was scheduled and pt refused, now awaiting new date

**-pt reports no changes today other than continued persistent itching**

**-this DID NOT improve with hydroxyzine which was started last visit**

[--additional history--]

-initially dx 2007 and tx w rituximab with subsequent recurrence and repeat tx w rituximab c/b development of an allergic vs infusion reaction

-recurrence dx again in 2019 with recommendation from onc at that time for repeat chemotherapy which the patient declined

-opted instead for treatment with an alternative medicine provider who prescribed topical rapamycin and naltrexone

-this regimen has not been continued as it is not evidence based and pt was instead referred to HUH oncology as above

**#. R 5th metacarpal neck fracture**

-seen by Dr. Wilson (ortho hand) and rec'd for surgical repair

-unchanged

-awaiting OR date

**#. HTN, h/o tachycardia**

-on metoprolol h/o HTN and tachycardia

-BP and HR WNL today

-feeling well

**#. L shoulder pain**

-awaiting PT eval which is pending

**Review of Systems**

ROS reviewed. No changes.

6/15/21

-have not yet heard back from Dr. Ali regarding an updated POC, called the number on file for his MA, no answer  
-will try again tomorrow

6/16/21

-spoke with Dr. Ali after pt's appointment today  
-he recommends referral to ENT for eval for excisional biopsy  
-if not able to surgically remove all impacted nodes, may require XRT in addition to chemo  
-will determine tx plan once lymph node and skin biopsies are completed

**05/25/2021 - Office Visit: care coordination, huh onc note**  
**Provider: Marlon Mitchell - MD**  
**Location of Care: Correctional Treatment Facility**

-have been attempting to obtain HUH onc notes for care coordination, was not available as of yesterday evening  
-today after multiple attempts able to obtain outpt onc note  
-notably, for cutaneous b cell lymphoma no b sxs, pt needs derm eval for repeat skin bx to assess the sample w/ molecular studies, PET scan for interrim staging, will need to be treated given symptoms (pruritis) w/ tx likely to be Gazyva/Bendamustine  
-->will also need bone bx + port placed  
-->pt agreed w/ plan  
-there are no s/s of recurrence for head and neck ca  
-pt has already been referred to derm, for PET and bone marrow biopsy
