RULE 10 RECORD ON APPEAL: STATEMENT OF THE EVIDENCE OR PROCEEDINGS

Comes now the defendant, Damon M. Beckley *pro se*, in the above styled case disputing the validity of the full inclusiveness of all statements made by Chief Judge James E. Boasberg (some comments having been *deleted* from the transcript as recorded in the Office of the Clerk.) Whereas the defendant alleges that Judge Boasberg's statement that follows:

1. *"In the end Mr. Beckley, you're not even going to prison for what you did in the Capitol Building on January 6th, (2021) you're going for what you said on social media before that"* has been *scrubbed* from the record.

Also, other false statements as follows are included in the transcript of record where it is stated that the judge said that

2. "we need to hurry to call the next case" (we were the last case that day,) and lastly,
3. "that the defendant will submit to DNA testing." This also was not said.

Please have the record corrected to reflect these edits and additions be reinserted and taken out respectively. Thank you.
