

if you would like to see some of their journey, you could check out Ethan's Facebook page.

Eliam had surgery April 20, 2020, developed "Posterior Fossa Syndrome" a couple days later where he completely lost all function in his body. Could not hold his head up, swallow or move. He was limp.

Feb 4, 2021 he was discharged from the hospital, able to use his little bike to leave on his own. He is now walking but does not have perfect balance. This is why your place, Toddler Town, will be so good for him.

It was very much appreciated.

We want to thank you so much for offering Eliam and Sister, Rory, a membership to Toddler Town. This is such a blessing and we want you to know how much we appreciate your kindness!

Thank you!
