

March, 2021

Dear Activist,

I am writing to offer you encouragement because I understand that you were caught up in the situation on January 6th. I am a well-wisher who saw your name and town on a list reported at NPR.org and simply looked up your address on whitepages.com. (If this is mistaken identity, please ignore this note, I only mean to help.)

I was one of hundreds of thousands supporting our President in DC on January 6th. Although I didn't personally go onto the Capitol grounds, I know that many normally peaceful people were caught up in the moment and it troubles me that they are being treated very differently from how Democrats would be treated. I saw a report of one January 6th protester from Georgia who committed suicide in the days afterward even though he had apparently only committed trespass and this was heartbreaking to me.

Did you know that large mobs of Democrats stormed Congress at least eight times during the Trump administration? They didn't storm the Capitol building itself, but they stormed various congressional office buildings illegally. These are the buildings next to the Capitol where Congress holds committee hearings and where most of them have their offices. They are part of Congress.

I think in your defense it is important to point this out and ask for fair treatment. It is important to be humble and remorseful, but also know that many times large swarms of Democrats stormed Congress in the last several years and they were arrested but did not receive harsh punishments. If you were peaceful and only committed trespass, then isn't it

fair that you should be treated similar to how those Democrats were treated? They too were angry and they too tried to disrupt the proceedings of Congress. They too occupied Congress illegally. The law must above all be fair. I am attaching a list of those instances. Maybe it could be useful to your defense.

On a personal note, I hope you can find comfort from God and faith. Good people from Martin Luther King to Soviet dissident Alexander Solzhenitsyn and Gandhi were mistreated by the law – not to mention Christ himself. All of them relied on faith to carry them through. Please stay away from alcohol and substances, and I hope your family can be with you during this difficult time. Take walks in nature and get other exercise to fight off depression. Avoid conspiracy theories – we don't need them. There are enough problems right before our eyes to protest against.

Also, don't feel like conservatism is lost. The left's policies don't work and so leftists eventually fail in the end. In the Soviet Union, the left had total power and things seemed totally hopeless for people of faith who loved their country. But leftist rule simply doesn't work and the Soviet system collapsed because of that.

Whatever happens, I hope you can feel honored and even grateful to God for the chance to suffer for the country which you love.

Sincerely,

Daniel

Eight Times When Leftist Protestors Illegally Mobbed Congress with Trump as President

What Trump supporters did on January 6th 2021, illegally occupying Congress in an angry but unarmed protest, is something that Democrat protesters have actually done on many occasions recently. Those protesters did not receive harsh sentences. Will the law applied now in the way it was applied then?

Below is a list of large protest events that featured over 40 arrests inside of Congress. These were not in the Capitol building itself, but at the Congressional office buildings. These are the buildings next to the Capitol where Congress holds committee hearings and where most of Congresspeople have their offices. They are part of Congress.
